

Chippewa County Safety Action Plan

Help Improve Chippewa County's Roads

What is a Safety Action Plan?

Chippewa County received funding from the U.S. Department of Transportation (DOT) for a Safety Action Plan to assess and improve road safety. The plan will identify the county's transportation needs and prepare a comprehensive strategy to prevent fatalities and serious injury crashes along county roadways. The plan will also make recommendations to improve road safety for all users including those who walk, bike and roll. The recommendations are rooted in evidence-based practices, with proven low-cost, high-impact strategies such as street lighting, safe walkways and improved signage to increase transportation safety in Chippewa County.

We need to hear from you!

Do you feel safe when traveling on county roadways? Do you have a challenge or suggestion on how to make the roads safer? Add your safety concerns to the linked comment map. You can provide feedback on all aspects of the transportation network and service areas. We are especially interested in locations along County Roads.

How will your input be used?

Helping the project team understand locations that are unsafe for people walking, biking, or driving will help identify potential safety projects for the County to consider. Together, we can create safer roads for Chippewa County.

Study Benefits

- Identify and prioritize roadway safety issues and improvements
- Eliminate roadway fatalities and serious injuries
- Engage the community, focusing on underserved groups
- Update county policies to align with safety goals
